

# CERTIFICATE IV IN AGRICULTURE

AQF CODE N/A | COURSE CODE AHC40122 | COURSE TYPE Qualification | RTO 3097

## Overview

**Standard Certificate IV** Develop your skills and knowledge to gain a supervisory role in an ever-expanding Agricultural sector! If you have a sound business mind and have practical agricultural skills and experience, or have completed a Certificate III in Agriculture, you could develop a career in the primary industry sector as a manager of a farming operation or agribusiness administrator. This course focuses on the practical technical skills, agricultural techniques and operations of running an agricultural enterprise.

**Agricultural Services and Supply Chain - Stock and Station Agent** Developed by Agricultural industry training specialists, this program is specifically designed to provide transactional agribusiness relationship insight and understanding, directly attached to a nationally recognised qualification. The flexible structure of this course makes it suitable for all areas of Agricultural service and supply chain industry providers, including but not limited to:

- Next generation Stock and Station agency engagement and understanding livestock administration requirements
- Livestock productivity and animal health value proposition
- Agri-finance engagement and operational understanding
- Livestock preparation, marketing and negotiation
- Wool technical and marketing
- Farm supplies relationships
- Finance sector productivity and transactional understanding of process
- Integration of emerging technology into agribusiness
- Supply chain participants - processors, feedlot, transport/logistics, media

## Duration

**Both Public & Trainee students:** usually complete the program within 12 - 24 months, training in classroom, via workshops and onsite mentoring.

## Requirements

It is preferable that you have Certificate III in Agriculture qualification (any stream), or have relevant agricultural/agribusiness industry experience.

## Assessment

The assessments will enable students to demonstrate the underpinning knowledge, skills, and attributes required to meet the course outcomes. A range of assessment strategies to meet different student's needs will be selected. Assessments may include written reports, project reports, portfolios and observations.

## Other Information

This course can lead into a Diploma or Advanced Diploma qualification.
